Declaration of Endorsement of and Commitment to the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (Charter and Code)

The Cyprus Institute of Neurology and Genetics as a bi-communal, non-profit, academic organization is dedicated to lessening the suffering of patients and their families and preventing diseases through patient care, research and educational programs on neurological and genetic conditions.

Since 2006, The Cyprus Institute of Neurology and Genetics, fully endorses the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers.

Many of these principles have already been implemented in our Institute and we have been accredited with the HR Excellence in Research Award in 2012.

The Cyprus Institute of Neurology and Genetics hereby declares its commitment to further implement these principles of Charter and the Code via the Human Resources Strategy for Researchers (HRS4R).

The Institute not only supports the work and development of individual researchers, but also aims to maintain the high quality of research in general.

We strongly believe that implementing these principles of the Charter and Code will contribute to further develop the European Research Area.

Prof. Leonidas Phylactou

Chief Executive Officer & Medical Director
