**Commitment of the  
European University Cyprus  
for Endorsement of  
The European Charter for Researchers and  
The Code of Conduct for the Recruitment of Researchers**

The European University Cyprus welcomes the European Commission's initiative to develop a European Researcher's Charter and a Code of Conduct for the Recruitment of Researchers.

Certainly this initiative will contribute to the development of a sustainable, attractive European environment for researchers, stimulating knowledge capacity and study escalation.

The affirmed vision of the European University Cyprus, that is a vigorously growing institution, operating on the principles of innovative education, is to become a leading learning and research institution, accommodating the ever-growing needs of modern society for quality-driven programs, at all levels, in key societal sectors. Acknowledging that part of what makes a triumphant university is a well-built record in research, the European University Cyprus places immense emphasis on nurturing high – quality research and sustaining excellent research personnel.

The European University Cyprus is therefore committed to the endorsement of both procedures and code of conduct, set out in the European Researcher's Charter, governing the recruitment, working environment and conditions of research personnel.

Moreover, the European University Cyprus is dedicated to promote the maintenance of a supportive environment and working culture for researchers in Cyprus based on principles of ethics, research freedom and professional responsibility.

**Prof. Kosta Gouliamos, PhD  
Vice Rector Research & External Affairs  
European University Cyprus**
