The University of Bordeaux, represented by its President, Professor Dean Lewis, fully endorses the principles of the European Charter for Researchers adopted by the Council on December 18, 2023.

As one of the leading research universities at the national level, with an expanding international outreach, many of these principles have already been adopted and integrated within our institution.

The University of Bordeaux hereby reaffirms its commitment to further upholding the principles of the Charter through the implementation of the various phases of the HR excellence in research award procedure.

By embracing these principles, the University of Bordeaux seeks not only to foster the development of individual researchers' careers but also to contribute to the advancement of high-quality research initiatives within the European Research Area.

Yours faithfully,

Dean LEWIS
Président
