

CNRS

A wide-angle microscopic image shows a surface with a prominent yellow diagonal line. A smaller, semi-transparent rectangular box is positioned in the upper-left quadrant of the image, containing the text "WELCOMING ASEAN RESEARCHERS IN CNRS LABS".

WELCOMING ASEAN RESEARCHERS IN  
CNRS LABS

# WELCOMING ASEAN RESEARCHERS IN CNRS LABS

## CNRS - French National Centre for Scientific Research

- Interdisciplinary public research organisation
- Internationally recognised for the excellence of its scientific research

### Research fields :

- Biology
- Chemistry
- Ecology and environment
- Humanities and social sciences
- Engineering and systems
- Mathematics
- Nuclear and particles
- Physics
- Information sciences
- Earth sciences and astronomy

**3.3 billion**  
A budget of

**33,000**  
people dedicated  
to research

**1,144**  
research  
laboratories in  
France and  
abroad

## CNRS participation in Horizon 2020 (2014-2020)

- Participation in 1728 H2020 projects (~18% success rate) including 507 MSCA projects (all actions incl.)
- **324 MSCA Individual Fellowships funded** (17,3% success rate)

### **Research axes - keywords**

## **Institute of Human Genetics (IGH)**

CNRS – University of Montpellier

UMR 9002

[www.igh.cnrs.fr](http://www.igh.cnrs.fr)

*Genome dynamics, Developmental genetics, Epigenetics, Molecular and cellular pathology*

## **Institute of Functional Genomics (IGF)**

CNRS – University of Montpellier - INSERM

UMR 5203

[www.igf.cnrs.fr](http://www.igf.cnrs.fr)

*Functional genomics of physiological and pathological cellular communications, neurobiology, endocrinology, oncology and cardiology, structural, biochemical, genetic, epigenetic, omics, physiological and behavioural studies, multi-omic approaches*

# Researchers interested to host and supervise MSCA postdoctoral fellows

## Dr. Nadine LAGUETTE (IGH)

**Keywords :** Inflammation, nucleic acid immunity, innate immunity, virology, tumor biology, metabolic disorders

The work of the "Molecular Bases of Inflammation" team revolves around the study of the mechanisms regulating chronic inflammation and its pathophysiological consequences. We are particularly interested in the mechanisms involved in the initiation, maintenance, resolution of inflammation and the metabolic consequences associated with the presence of pathological nucleic acids. This work is of crucial importance for understanding anti-viral and anti-tumor responses - and more generally for pathologies presenting chronic inflammation.

Main publications : [here](#)

## Dr. Sofia KOSSIDA (IGH)

**Keywords :** Immunogenetics, immunoinformatics, artificial intelligence, bioinformatics

IMGT®, the international ImMunoGeneTics information system® <http://www.imgt.org>, is the global reference in immunogenetics and immunoinformatics. The three current main axes of research within IMGT® are: 1) Deciphering the IG and TR locus, genes and alleles in genomes of vertebrates, 2) NGS based analysis of the expressed repertoires of the adaptive immune responses and 3) IMGT databases and tools for the analysis of the adaptive immune proteins.

Main publications : [here](#)

# **Researchers interested to host and supervise MSCA postdoctoral fellows**

## **Dr. Rosemary KIERNAN (IGH)**

**Keywords :** Chromatin, transcription, gene regulation, molecular biology of cancer

Our projects of the 'Gene Regulation' lab aim at unravelling the complex mechanisms involved in expression of the human genome at the molecular level using genome-wide approaches. We are interested in understanding how these mechanisms are subverted and exploited in pathological conditions such as HIV-1 infection and cancer.

**Main publications :** [here](#)

## **Dr. Julie PANNEQUIN (IGF)**

**Keywords :** Signaling, Plasticity and Cancer, cancer stem cells, colorectal cancer.

Our main projects aim at understanding key mechanisms in chemoresistance and tumor dissemination in order not only to increase our knowledge but as well to propose new clinical tools to improve patient management care. Research models are starting from cancer cells to patient samples with a strong *in vivo* activity including xenografts and transgenic mice.

**Main publications :** [here](#)

## 6 types of laboratory UMR type at CNRS MOY100 Ile de France Villejuif Research Areas & KEYWORDS

LARCA

UMR8225 Research Unit for the study of English-speaking Countries and Culture(LARCA) <https://larca.u-paris.fr/en/home/>

**Keywords and Axes:** History ; Literature ; Arts; Anthropology ; Arts and Visual Culture ; Boundaries of literature ; History of Politics in English-Speaking Countries ; Gender and Sexuality Studies ; Early Modernities and the Circulation of Knowledge **Cross Axes:** Environmental Humanities ; Medical Humanities ; Working Classes ; Material Culture in Question ; The Periodical Press : from Paper to Digital ; Writing History from the Margins

UMR8211 Center for Research on Science, Medicine, Health and Society (CERMES 3) <https://www.cermes3.cnrs.fr/fr/>

**Key research axes:** Diversification of health care practices and settings; Policies related to knowledge; Innovation, markets and social welfare **Expertise areas:** Specific skills regarding the production, diffusion and use of knowledge and techniques ; A varied and multifaceted approach to innovation, at the crossroads of health needs, social welfare and markets ; The observation of medical and care work and practices ; A renewed approach to globalization taking into account the effects of symmetry between Northern and Southern countries.

UMR7591 Laboratoire d'Electrochimie Moléculaire (LEM) <http://www.lemp7.cnrs.fr/Index.htm>

**Keywords:** Molecular electrochemistry - molecular engineering - theoretical, methodological and instrumental developments - valorisation and technology transfer **Fundamental research - areas of activity:** Reactivities, Electro- and Photo-catalysis using electron transfers – Small Molecules ( CO<sub>2</sub>, O<sub>2</sub>, N<sub>2</sub>) activation), (Bio)Electroanalytical Methodologies and Reactivities - Charges transfer/transport in mesoporous electrodes, Electrochemistry and Engineering of Supramolecular Assemblies - Surface functionalization - Electrochemical activation /detection of halogen bonds, Biomacromolecular Systems - Electron Transport at the Nanoscale **Investigation tools:** electrochemical, photochemical, spectroelectrochemical methods (UV-Vis, IR, XAS), Mt/AFM-SECM microscopy

UMR8258 Lab Chemical and Biological Technologies for Health (UTCBS) <https://www.utcb.s.cnrs.fr/>

**Keywords:** Nanomedicine, Imaging Agents, Theranostic, targeting, Physico-chemistry **Multidisciplinary Research on nanovectors dedicated to Health:** Nanotechnologies for Health, Physico-chemistry, Pharmaco-techny, Biological Evaluation, Chemistry, Pre-formulation Characterization, Formulatio, Dedicated Animals Models, Optical Imaging Platform

UMR7583 Laboratoire inter-universitaire des systèmes atmosphériques (LISA) <http://www.lisa.u-pec.fr/en>

**LARGE SCALE POLLUTION EVOLUTION OF ORGANIC CARBON ACTIVITIES :** Physico-chemistry of air pollution, air pollution modelling, secondary aerosol and pollutant formation, sensitivity to emission changes, interaction of air pollution and climate change; Pollutant emissions (NO<sub>x</sub>, VOCs, NH<sub>3</sub>), inverse modelling, satellite observations of pollutants, recent trends and driving processes ; Atmospheric aerosols, light-absorption, ageing, secondary organic compounds, optical calculations, radiative effects, climate simulations ; Atmospheric aerosols, light-absorption, ageing, secondary organic compounds, optical calculations, radiative effects, climate simulations; Multiphase evolution of organic carbon in the troposphere :atmospheric chemistry, air pollution and climate, organic compounds, organic aerosol, detailed chemical mechanisms, box models ; **POLLUTION :** Impacts of Urban Air Pollution on Inhabitant's Health : Environmental Chemistry - Analytical Chemistry - Physical Chemistry - Atmospheric simulation chambers - SOA - ultrafine aerosols - preclinical models - cells - organoids - organ-on-a-chip **ASTROBIOLOGY** Planetology / Exobiology : Comets / Planets / Satellites / Ocean Worlds / Exoplanets / In situ observation / space missions / laboratory simulations / Spectroscopy / organic chemistry / Solid-gas interactions / Gas chromatography / Liquid chromatography / mass spectrometry / VUV / spectroscopy / IR spectroscopy

UMR7597 'History of Linguistic Theories' Laboratory (HTL) <http://htl.linguist.univ-paris-diderot.fr/welcome>

**Areas of research - Key words:** History of grammatical tools such as grammars, dictionaries, lexica, manuals, etc ; History of grammatical notions (e.g. 'part of speech') ; History of ideas about language and languages ; History of grammatical / linguistic schools ; (e.g. 'the Pāṇinian school', 'Structuralism')

# Supervisors List

Join a multidisciplinary group with multi-nationalities to work in a well-being atmosphere located in the center of PARIS, close to the beautiful Jardin du Luxembourg

## SUPERVISORS

### Team Nathalie Mignet

[Nathalie.Mignet@u-paris.fr](mailto:Nathalie.Mignet@u-paris.fr)

#### Vectors for Molecular Imaging and Targeted Therapy « Vector »

Formulation for the conception of drug delivery, liposomes, nanocrystals,  
Physico-chemical characterisation of nanoparticles  
Formulation of biologics, sol/gel systems  
Optical imaging platform, Animal experimentation, cancer models

### Team Virginie Escriou

[virginie.escriou@u-paris.fr](mailto:virginie.escriou@u-paris.fr)

#### Biotherapies by Nucleic Acid Vectorisation « Biotherapy »

Biotherapies: gene therapy, siRNA, gene vaccination  
Nucleic acid delivery  
Animal Experimentation : model of hepatic fibrosis

### Team Salima Hacein-Bey-Abina

[salima.hacein-bey-abina@u-paris.fr](mailto:salima.hacein-bey-abina@u-paris.fr)

#### Cytokine modulation of Hematopoiesis « Immunology »

Biotherapies – Gene and cell therapy  
Role of cytokines in hematopoiesis, EPO  
Animal Experimentation: breast cancer model, EPO KO

Join a Leading European research center in the social studies of medicine, science and health, and their relations to society

## SUPERVISORS

### Jean-Paul Gaudillière, Historian (INSERM and EHESS)

<https://www.cermes3.cnrs.fr/en/members/445-gaudilliere-jean-paul-en>

### Laurent Pordié, Anthropologist (CNRS)

<https://www.cermes3.cnrs.fr/en/members/296-pordie>

### Simeng Wang, Sociologist (CNRS)

<https://www.cermes3.cnrs.fr/en/members/566-wang-simeng>

Beside developing cutting edge research, our multidisciplinary team is committed to students' supervision and training in various parts of the world, including South and South East Asia.

Current research at the CERMES3 gives emphasis to the notion of crisis in order to study rising tensions within the domains of medicine, science and health likely to lead to disruption or radical change. Our scope of interest and expertise ranges from mental health to genetics, traditional Asian medicine to biotechnologies, health-at-work to handicap, or again the environment.

Main Contact : [laurent.pordie@ehess.fr](mailto:laurent.pordie@ehess.fr)

Visibility and attractivity: extensive collaborations with numerous French and foreign groups very strong involvement in training (Master's degree, International school of cyclic voltammetry CVIS, EUR Chemistry)

## SUPERVISORS

### PI : Marc ROBERT [robert@u-paris.fr](mailto:robert@u-paris.fr)

**REACTE: Reactivity and Catalysis using electron transfers** Molecular electrochemistry, molecular catalysis and catalytic films, photocatalysis, activation of small molecules ( $N_2$ ,  $CO_2$ ,  $O_2$ ,  $H_2O$ ), reaction mechanisms, *ab initio* calculations

LISA (Laboratoire Interuniversitaire des Systèmes Atmosphériques), UMR CNRS 7583 is a mixed research laboratory between Paris-Est Créteil University (UPEC), Université de Paris (UP) and CNRS. It is a component of the Observatory of Sciences of the Universe EFLUVE and of Institut Pierre Simon Laplace (IPSL), a Federation of 6 research laboratories working on environment and climate in the Paris region.

# Supervisors List

East-Paris Institute of Chemistry and Materials Science (ICMPE) From molecular chemistry to materials science - organics vs. inorganics

## Department C3M: Molecules, macromolecules & polymer materials: structure-property relationships

Contact : Benjamin Carbonnier, head C3M  
[carbonnier@icmpe.cnrs.fr](mailto:carbonnier@icmpe.cnrs.fr)

## Department M2I : Inorganic, metallic, and Intermetallic materials & nanomaterials: design, modelling, elaboration

Contact : Eric Alleno, head M2I  
[alleno@icmpe.cnrs.fr](mailto:alleno@icmpe.cnrs.fr)

The Institute was founded by Jacques Monod, Nobel Prize in Medicine and Physiology in 1965, to promote the study of molecular biology in France. Our research aims at answering questions in fundamental biology

Michel Werner - Director Valérie Doye – Deputy director  
Christine Bénichou – Secretary general

Main Contact : [michel.werner@ijm.fr](mailto:michel.werner@ijm.fr)

Supervisors & publications :
