

## Student Mobility

- ▶ The Chateaubriand Fellowship allows American doctoral students to stay in France for a period of 4-9 months. It aims to initiate or reinforce collaborations or joint projects between French and American research teams.

<https://chateaubriand-fellowship.org>

- ▶ The French-American Doctoral Exchange (FADEX) aims to enhance scientific exchanges between American and French Ph.D. students working in the same field of research in order to encourage the development of future French-American collaborations. This program also serves as an opportunity for American students to better understand the French research system.

## French-American Scientific Collaboration

### Bilateral Funds

- ▶ The bilateral funds established between France and the University of California at Berkeley, Stanford, University of Chicago, University of Texas at Austin, and MIT fund French-American cooperation programs each year that promote student and researcher exchange. <https://france-science.com/en/bilateral-funds/>

### Thomas Jefferson Fund

- ▶ This program, launched by the Embassy of France in the United States and the FACE Foundation, aims to encourage and support cooperation among the most promising young French and American researchers and foster innovative collaborative research projects. <https://france-science.com/en/thomas-jefferson-fund-2/>

## Innovation in Relation to Research

- ▶ The NEw Technology Venture Accelerator (NETVA) offers a program to young, innovative French High-Tech Start-ups supported by academic research that includes customized support, an analysis of opportunities and the development of technological partnerships in the United States, particularly in Boston, San Francisco, Washington, DC, Houston, Atlanta, Los Angeles and Chicago.

- ▶ The YEi (Young Enterprise Initiative - Start in France) aims to promote the appeal of France by encouraging young foreign technological companies, particularly American, to discover the French research and innovation ecosystem during an immersion week in France.

<https://yeifrance.com>

- ▶ The French-American Innovation Days (FAID) are annual events that bring together prominent French and American experts to discuss preeminent innovation topics. The participation of start-ups and companies in these events not only enables the promotion of the excellence of French and American research institutions and companies but also the fostering of scientific, technological, and industrial connections between France and the United States. <https://france-science.com/en/category/faid-en/>

## Thematic Programs

- ▶ The French Ameri-Can Climate Talks conference series started during the preparation of the Paris Agreement on climate in 2015. Since then, topics such as the ocean and biodiversity have sustained these general public meetings and the dialogue between scientists, politicians, NGOs, etc. on important societal issues.
