Piloting new processes based on lessons learnt

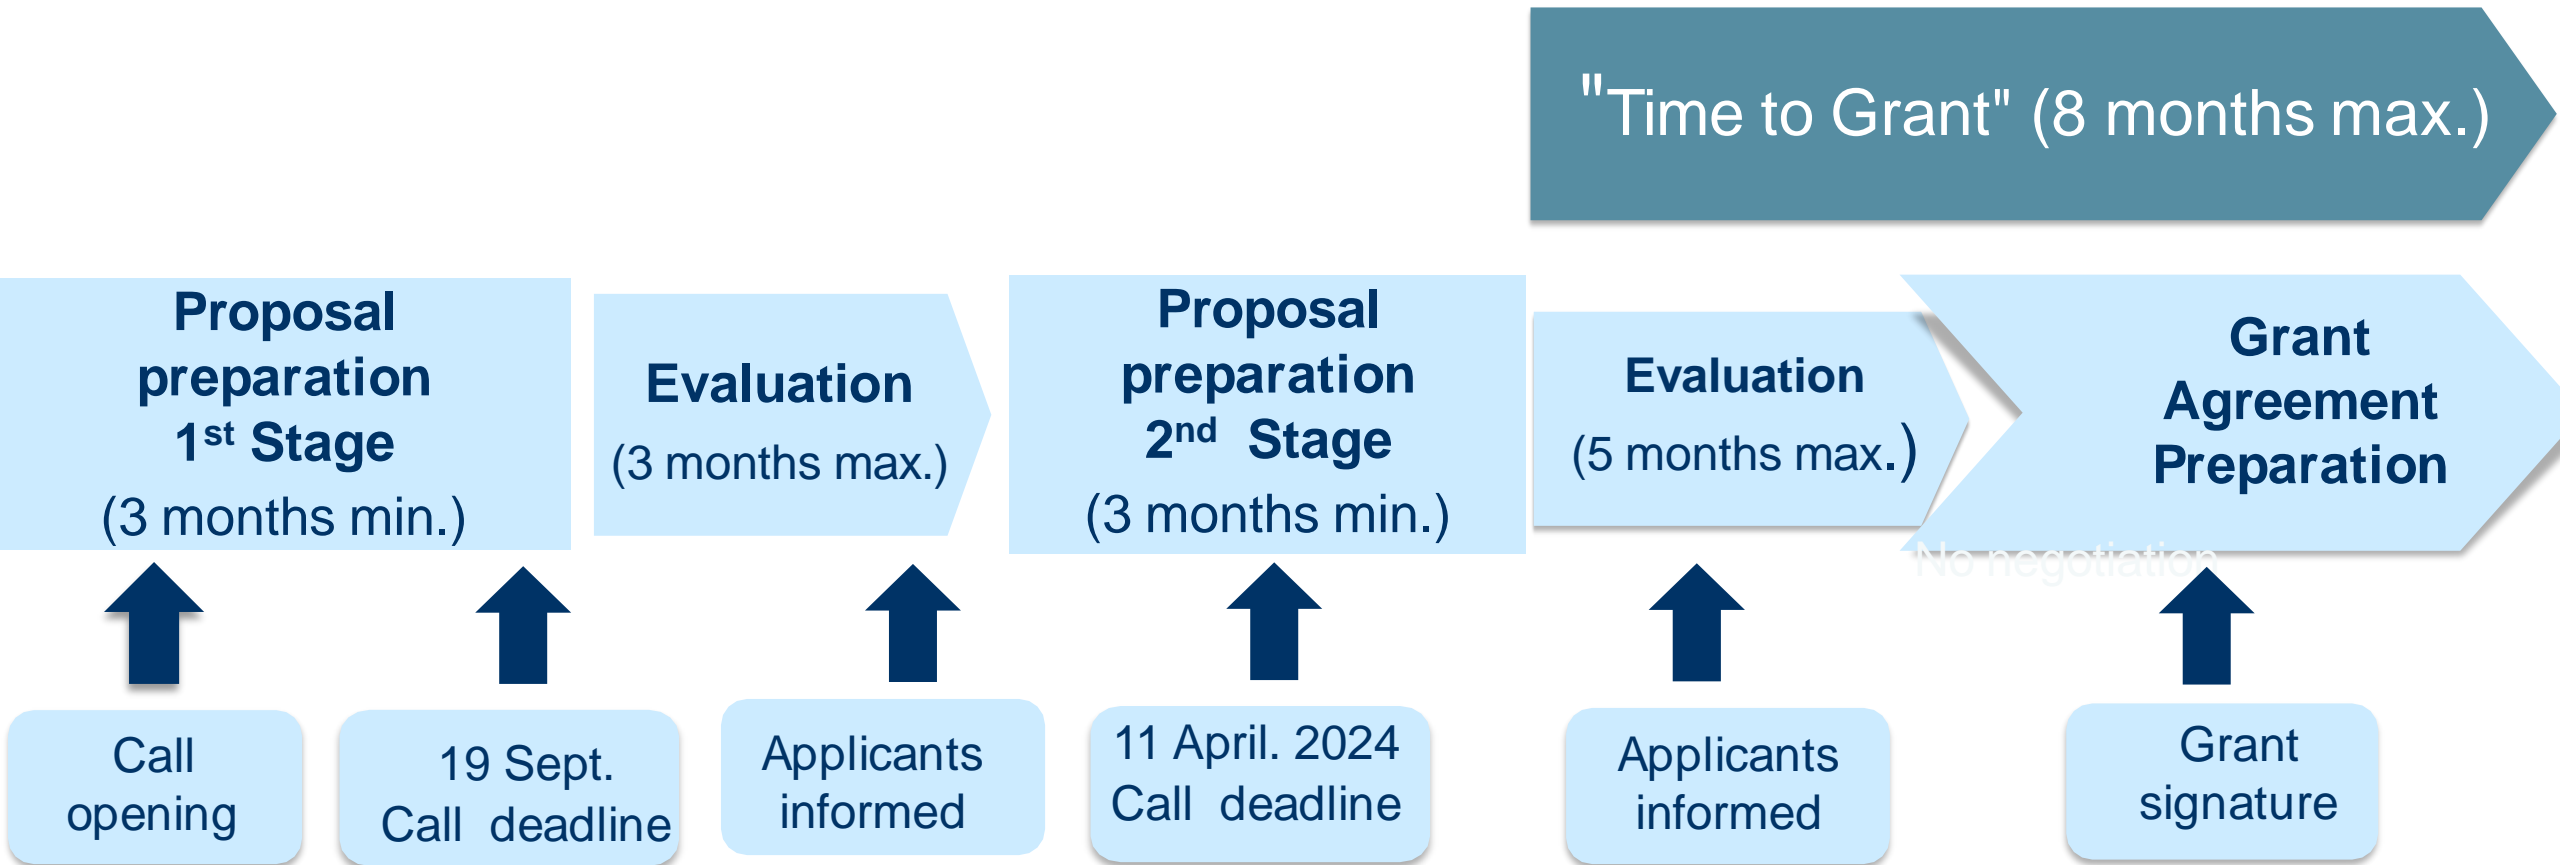

Blind evaluation (in 1st stage)

- There is no evidence that the current proposal evaluation system is systematically biased.
- There are understandable concerns that evaluation experts may be swayed – perhaps unconsciously – in favour of proposals from well-known organisations in countries with better performing R&I systems.
- ‘Blind’ evaluation is a way to remove any real or perceived effect of such reputational bias.
- Experts evaluate without knowing the identity of participants.
- NEW admissibility criteria: Applicants submitting a proposal under the blind evaluation must NOT disclose their organization names, acronyms, logos nor names of personnel in Part B of their first-stage application.

No identification data can be mentioned by applicants in the proposal's Part B otherwise inadmissible proposal
