Research Council of Finland: <https://www.aka.fi/en/>
8. EDUFI Fellowships for hosting international PhD students in Finland:
<https://www.oph.fi/en/development/edufi-fellowship>
9. General info about living and studying in Finland: <https://www.studyinfinland.fi/>
10. A very quick search to find the fields of studies available in Finnish academia:
<https://opintopolku.fi/konfo/en/>

Examples for open positions;

<https://www.helsinki.fi/en/research/doctoral-education/university-funded-doctoral-researcher-positions>

<https://fi.linkedin.com/jobs/phd-position-jobs?position=1&pageNum=0>

General tips for finding field specific PhD positions;

1. Look at the funded PhD positions advertised under 'Open positions' in the Finnish universities. These can come any time of the year based on the availability of funding. Make it a habit to check these positions regularly.
2. Or, you can apply for regular application schedules and processes of the Doctoral Schools of the Finnish universities. The calls and schedules are different and many times in a year for each of the Finnish university. Please note and make a schedule of the application periods of the ones interesting for you (see the links in point 2 above).
3. The research positions in the Finnish universities are very multidisciplinary in nature. So, use different key words to look for positions. A very narrow search for example PhD in Microbiology or PhD in Neuroscience may not be fruitful. Invest your time to find the research groups and academics working in your area of interest by searching in different sources, for example, the research.fi database or the research database of each university, for example, <https://research.aalto.fi/>.
4. In some cases, contacting a professor with very concrete expression of interest to work in his/her area may be required
5. The application and selection processes are straightforward as is described for that position.
