

EUROPEAN COMMISSION  
DIRECTORATE-GENERAL FOR RESEARCH AND INNOVATION

Directorate C – Clean Planet  
The Director

Brussels, 6 May 2024  
RTD.C/RV

Dear Sir, / Dear Madam,

On behalf of the European Commission, I am delighted to extend an invitation to attend the "*EU-Indonesia Synergy Meetup on Clean Hydrogen and Sustainable Cities*", that will take place on May 14, 2024, at the Udayana University Campus in Bali.

Research and innovation are pivotal drivers in propelling the global clean energy transition. Recognizing the significance of international collaboration in research and innovation, this event aims to foster collaboration and knowledge exchange between the European Commission and Indonesian Research Communities. It provides a platform for both parties to present their perspectives on the role of R&I in the green and digital transformations and explore avenues of cooperation in science, technology, and innovation, particularly in priority domains such as clean hydrogen and sustainable cities.

The EU-Indonesia Synergy Meetup will offer a unique opportunity for dialogue and collaboration between our respective regions on clean energy strategies, and potential areas of cooperation. Moreover, it will present an ideal platform to explore potential participation for Indonesia in initiatives such as the Marie Skłodowska-Curie actions under the Horizon Europe framework programme, and multilateral initiatives like Mission Innovation.

We believe that your participation will greatly enrich the discussions and contribute significantly to advancing our shared goals of accelerating the clean energy transition through research and innovation. Your insights and expertise are invaluable as we work towards shared goals of sustainability and innovation.

We look forward to welcoming you to the EU-Indonesia Synergy Meetup and to fruitful discussions and collaboration.

Yours faithfully,

Rosalinde van der Vlies
