7. The applicants may be national, foreign and stateless, with a doctorate degree in Food Science or Engineering, Chemical and Biological Engineering or Bioengineering and a scientific and professional curriculum vitae that reveals an adequate profile for the activity to be developed. If the doctorate degree was awarded by a foreign higher education institution it must comply with the provisions of Decree-Law no. 66/2018, August 16.

8. Admission Requirements:

8.1 Applicants shall be at least 18 years of age or older, not be inhibited to holding a job in the public sector nor forbidden to perform the intended position; applicants shall also be in good health and possess the psychological profile required for the job and shall meet the compulsory vaccination requirements, in accordance with Article 17 of LTFP.

8.2 - Specific requirements for admission are those defined in the 7th paragraph and previous research experience in the area of 3D food printing, food innovation, as well as the physico-chemical characterisation of foods, with an emphasis on food rheology. The candidate must have a minimum of 10 publications in SCOPUS in the last 5 years and a minimum of 100 citations in the last 5 years.

9. According to article 5 of RJEC, selection is to be made based on the candidate's scientific and curricular evaluation.

10. Scientific and curricular career evaluation is based on relevance, quality and up-to-dateness:

a) of scientific and technological production in the last five years, deemed most relevant by the candidate; b) of research activities, applied or based on practical work, developed in the last five years, deemed most impactful by the candidate; c) of knowledge extension and dissemination activities developed in the last five years, namely under the scope of the promotion of culture and scientific practices, deemed most relevant by the candidate; d) of the activities of management of science, technology and innovation programmes, in Portugal or abroad, deemed most relevant by the candidate.

11. The five-year period mentioned above may be extended by the panel, if requested by the candidate, whenever the suspension of scientific activities is justified on socially protected grounds like paternity leave, long-term serious illness, and other legal situations of unavailability to work.

12. The evaluation criteria are the following:

12.1 Evaluation of the Scientific and Curriculum Pathway (SCP), in which the following are weighted based on document analysis:

C1) Integrated evaluation of the scientific production of the candidate in the last five years, starting from a global vision of the merit of his / her scientific and curricular path, namely the coherence and quality of the CV:

- The diversity of quality scientific indicators including books and book chapters, peer-reviewed articles in relevant journals in the field, and patents;

- And relevant experience, specifically in the area of 3D food printing, food innovation, as well as physicochemical characterisation of foods, with an emphasis on food rheology.

C2) Evaluation of the fundamental activities of research, fundamental, applied, or practice-based research developed over the last five years and considered to be of greatest impact by the candidate, as well as extension, outreach, and dissemination activities, namely coordination or participation in research projects; technology transfer actions; organization of scientific events; participation in scientific committees of scientific events; participation as speaker in scientific events; participation in activities of outreach and dissemination of science.

Candidates will be ranked by the scientific and curricular evaluation (APCC) quantified by the following formula: $APCC = 0,6 \times C1 + 0,4 \times C2$.

12.2 The three best candidates from the resulting list will be invited for a public interview, which will be conducted in English, and may be held by videoconference.

13. After this phase the candidates will be sorted by their final classification, resulting from the application of the following formula: $CF = (APCC \times 0,9) + (ENT \times 0,10)$.

14. The final classification of the candidates is expressed in a scale of 0 to 20 values, considering the valuation up to the hundredths.

15. The jury shall deliberate by means of a nominal vote based on the selection criteria adopted and published; abstentions are not allowed.

16. Minutes of the jury's meetings, containing a summary of what has taken place in the meetings, as well as the votes cast by each of the members and their reasons, will be available to candidates whenever requested.

17. After completing the application of the selection criteria, the jury will draw up an ordered list of successful candidates with their classification.

18. The final decision of the jury is approved by the President of the institution, which also decides on the hiring.

19. Formalisation of applications:

19.1. Applications must be formalized using the formal request provided in the website of the Polytechnic of Leiria <https://www.ipleiria.pt/recursos-humanos/concursos/> addressed to the President, and the application must include:
